| 09:00-10:30 | **Welcome and Opening (ONSITE ONLY)**  
**Keynote Speech**: Frank Bannister  
**Location**: Studenthuset, Lövverket |
| 10:30-11:00 | Coffee break  
**Zenit, Zero** |
| 11:00-12:30 | **Session 1 (onsite/online)**  
Studenthuset, Flexsal A  
**Session 2 (onsite/online)**  
Studenthuset, SH62  
**Session 3 (onsite/online)**  
Studenthuset, SH63 |
| 12:30-13:30 | Lunch  
**Zenit, Zero** |
| 13:30-15:00 | **Workshop I (only)**  
Studenthuset, Flexsal A  
**Session 4 (onsite/online)**  
Studenthuset, SH62  
**Session 5 (onsite/online)**  
Studenthuset, SH63 |
| 15:00-15:30 | Coffee break  
**Zenit, Zero** |
| 15:30-16:50 | **Session 6 (onsite/online)**  
Studenthuset, Flexsal A  
**Session 7 (onsite/online)**  
Studenthuset, SH62  
**Session 8 (onsite/online)**  
Studenthuset, SH63 |
| 17:00-18:00 | **IFIP 8.5 Business meeting** (onsite/online)  
Zenit, Zero |
| 18:15 | **Bus for Welcome Reception** – the bus departs from the A-building (look for the Taxi sign). |
| 18:30 | **Welcome Reception at Linköping Castle**  
Lasts approx. 1 hour – Afterwards, dinner on your own. |
**Wednesday 7 September**

**KEYNOTE PRESENTATIONS**

**Beyond the Box Reflections on Blue Sky Thinking**

*Frank Bannister, Trinity College*

Frank Bannister is a Fellow Emeritus in the School of Computer Science and Statistics in Trinity College Dublin. Prior to becoming an academic in 1995, he worked in the Irish civil service and subsequently as a management consultant for PricewaterhouseCoopers. His research interests include e-government, e-democracy, on-line privacy and trust and IT value and evaluation, particularly in the public sector. For eleven years he was co-chairman of the Permanent Study Group on e-Government in European Group for Public Administration. He was the founding editor of the Electronic Journal of e-Government, is an Associate Editor of Information Polity and a former Associate Editor of Government Information Quarterly. Frank is a Fellow of the Institute of Management Consultants in Ireland, a Fellow of the Irish Computer Society and a Chartered Engineer.

**Abstract:** Research in e-government and e-democracy largely stays within the safe confines of self-imposed boundaries. There are good reasons why this is so and, between them, publishers and conference organisers have evolved structures and modi operandi designed to service long established academic advancement and promotion structures and reward systems. While this arrangement suits both sides, it has contributed to creating a risk averse research and publication culture that has resulted in a large corpus of well executed, sometimes important, but often not terribly interesting research. The field also suffers from a surfeit of delta papers, me-too papers, literature reviews, general surveys and sometimes a preference for rigor rather than relevance as opposed to radical ideas and debate. The whole system disincentivises engagement in controversy and/or blue-sky thinking. This talk will explore this phenomenon and suggest some ideas that may help the field become more lively and provocative - in the best sense of that word.
From Feared Tax Collector to Popular Service Agency

Anders Stridh, Swedish Tax Agency

Anders has over thirty years of experience in developing and transforming The Swedish Tax Agency to one of the most trusted institutions in the Swedish society. He has together with Mr. Lennart Wittberg written the book “From feared tax collector to popular service agency” describing the transformation on a strategic level with a strong focus on trust, compliance, taxpayer relations and willingness to comply. He has also a long experience in international cooperation specialised in strategies and change management.

Abstract: “How can an agency that takes people’s money be so popular and appreciated?” Much of the answer to that question lies in the process of change that the Swedish Tax Agency has carried out in recent decades. Through value management and determined work with attitudes, the Tax Agency has changed from a feared tax collector into a popular service agency trusted by the public.

Trustworthy AI – The European Approach

Fredrik Heintz, Linköping University

Fredrik Heintz is a professor of Computer Science at Linköping University, where he leads the Reasoning and Learning lab. His research focus is artificial intelligence especially Trustworthy AI and the intersection between machine reasoning and machine learning. Director of the Wallenberg AI and Transformative Technologies Education Development Program (WASP-ED), Director of the Graduate School of the Wallenberg AI, Autonomous Systems and Software Program (WASP), Coordinator of the TAILOR ICT-48 network developing the scientific foundations of Trustworthy AI, and President of the Swedish AI Society. Fellow of the Royal Swedish Academy of Engineering Sciences (IVA).

Abstract: Europe has taken a clear stand that we want AI, but we do not want just any AI. We want AI that we can trust. This talk will present the European approach to Trustworthy AI and give an overview of some of the major consequences and interesting research problems related to Trustworthy AI. The successful realization of Trustworthy AI will be paramount for addressing the major challenges we as a global society is facing. The talk is partly based on the ongoing work in the H2020 ICT-48 network TAILOR which has the goal of developing the scientific foundations for Trustworthy AI through integrating learning, optimisation and reasoning.

Please note that the keynotes by Frank Bannister and Anders Stridh are not available online – due to technical constraints in the venue.
PAPER PRESENTATIONS

During the paper sessions, each speaker will be given approx. 25 minutes to present and receive feedback on their paper. This means that each presentation can be about 15-20 minutes long (and may not exceed 20 minutes).

The vast majority of participants will participate onsite in Linköping, meaning that most paper presentations will take place in person. Due to the Covid-19 pandemic and its effects, a smaller number of our participants need to participate online. Online participation is possible for all paper sessions (both for presenting and for listening to presentations). All session rooms (Flexsal A, SH62, SH63) are equipped with cameras and microphones. Sessions will be broadcasted using Zoom (Zoom-links will be provided in the final version of the program).

There will be two roles present in each session to support the speakers and ensure a good conference experience for everyone;

- **A session chair** - a person from the conference organization (typically track chairs), responsible for introducing the speakers, time keeping, and moderating the discussions. The responsible session chair is underlined in the programme above.
- **A session assistant** - a person from Linköping University, responsible for the technical equipment and surveilling the Zoom room.

Lastly, in order for the sessions to run smoothly, we run the presentations from a stationary computer. In other words, speakers will not be allowed to present their work using their own laptops. For this reason, the local organization needs access to the presentations before the conference:

- **We kindly ask those presenting papers at the conference** (both onsite and online) **to submit their presentations** (preferably a PowerPoint file) **to localhost.egov2022@liu.se no later than September 2nd.**
POSTER PRESENTATIONS

Posters will be presented in the Zenit building during lunch on Wednesday, September 7.

1. Anastasija Nikiforova - Gen Z open data hackathon - civic innovation with digital natives: to hack or not to hack?

2. Lucy Temple, Gabriela Viale Pereira and Luiza Schuch de Azambuja - Building Smart City Governance Competencies: The CAP4CITY training modules

3. Luiza Schuch de Azambuja - Identifying factors that influence the transition towards a smarter sustainable city: Preliminary findings of the case study of Porto Alegre, Brazil

5. Matheus Cruz, Betânia Santos, Flavio Diniz, Marcelo Persegonia, Neyson Freire, Raissa Barcellos and Flavia Bernardini - Nursing Observatory: a platform to support public policies in the fight against Covid-19

6. Francesco Mureddu and Roberto Di Bernardo - SPOTTED - Satellite Open Data for Smart City Services Development

35 Interrogating e-Justice: Lessons from Digitalizing Courts in Chile - Joaquin Santuber, Reem Abou Refaie and Christoph Meinel

The winners will be revealed in the Awards Ceremony on Wednesday 7 September.
LOCAL INFORMATION

The EGOV 2022 conference is hosted by the Division of Information Systems and Digitalization, at the Department of Management and Engineering, Linköpings Universitet (LiU). LiU is known for its interdisciplinary research and offers many innovative educational programmes. The university has approx. 32,000 students and 4,000 employees, distributed across on four campuses. EGOV will be arranged on our largest campus – Campus Valla – which is situated just outside the city center of Linköping (marked in yellow in the map below).

Important information:

- Please note that Sweden is a cash-free society; paying with debit or credit cards such as MasterCard, Visa, or American Express is therefore needed, since most stores and services do not accept cash.
- Tap water in Sweden is of high quality and is perfectly safe to drink.
- Internet - All European academics will be able to be connected to the Internet through the Eduroam connection. Participants without an Eduroam account can connect to Internet through the open network provided by Linköping University. Please contact the registration desk if you need help connecting to the network.
Find your way at Campus Valla

The sessions and presentations are held in various lecture halls at Campus Valla.

Our conference meeting area is in building Zenit. Here, you can register for the conference and food is served here during lunch and breaks. The registration desk is staffed all day, in case you need assistance or have questions.

All paper sessions will be held in the building called Studenthuset. Studenthuset is situated just opposite of Zenit and the heart of Campus Valla, where you find cafés, lecture halls, and our library. The lecture halls SH62, SH63, Flexsal A, and Lövverket are situated in Studenthuset.

The closing key note speech is held in Building Key, located next to Studenthuset.

To help you to find your way at Campus, there will also be printed signs with directions to the lecture halls, marked with EGOV2022.
Welcome reception

In the first evening of the conference, we are welcomed to Linköping Castle for a shorter welcome reception. The Governor of Östergötland will greet us with a speech, followed by opportunities to mingle and socialize over canapes and drinks.

Linköping Castle is situated in city center, just next to Linköping Cathedral. A bus has been rented to take us to the castle directly aft the IFIP WG 8.5 Business Meeting. The bus leaves from the A-building at 18.15 (look for the Taxi sign).

Linköping castle was originally built as a bishop´s house, but during the 16th century it was remodeled into a royal palace and later, it became the residence of the Governor of Östergötland. The oldest parts of Linköping Castle stem from the 1100s and makes the castle the oldest secular building in Sweden. In 1700, a great fire destroyed large parts of Linkoping, including the town hall. At that time the castle was abandoned and the eastern parts of the castle's wings were later turned into a prison. Today, the castle is the residence for the Governor of Östergötland and holds a Castle- and Cathedral Museum.

Conference Dinner

Linköpings Festvåning (Banquet Hall) is our location and host for the conference dinner. We will be served a three course dinner that is cooked with mostly locally grown ingredients, and dine in an antique setting under elegant chandaliers. For those participants that wants to socialize further after the dinner, Linköpings Festvåning houses a rustic brick cellar with a relaxed/cosy bar, just one storey below the Banquet Hall.

Linköpings Festvåning is situated at Klosterstrågatan 45C, in a convenient walking distance from the city center. For those who wish, we will meet up at Stora Torget, at the entrance of Elite Stora Hotellet, to walk to the venue together. Meeting time: 18.15.
Guided tour in Gamla Linköping

In Gamla (old) Linköping Open-Air Museum, situated next to Campus Valla, you can travel back in time and experience what Swedish life was like in a small town and in the countryside a hundred or more years ago. In the old town neighbourhood you will find wooden houses surrounded by back yards, beautiful gardens and cobblestone alleys. Here too are many exhibitions, shops and crafts, restaurants and cafés.

A short walk through the Valla woods nature reserve takes you to Valla Farm, the rural part of the museum, with farm animals and houses showing the history of the countryside. In the woods, there are plenty of forest paths, as well as an experiential trail where you learn more about Swedish animals and nature.

For those who are interested, we will organize a guided tour to learn about Linköping in the early 1900, and hear stories about the lives, dreams, and destinies of the families that lived here. The tour lasts approximately 60 minutes.
About Corvinus

Corvinus University of Budapest is the best educational institution in Hungary in the fields of economic, management and social sciences. The institution offers state-of-the-art knowledge, a professional network and a secure future for its 10k+ students. The institution builds on more than hundred years old history. Corvinus essentially educates the social and economic elite of the region. It strives to produce scientific results that are relevant for Hungary, Europe and the world and that promote our objectives. Founders of the university believe that only talent and ambition should count – social or financial status should not prevent anyone from studying. Therefore, the Corvinus Scholarship Programme is based on excellence and was created to ensure free-of-charge education for the best, most talented students. Corvinus stands for quality and opportunities, for state-of-the-art and useful knowledge, for extensive social capital, for career opportunities, for life-long friendships and community.

Regarding numbers, the university has 120+ years of history, 10,000+ students, 1,500 international students from 80+ nationalities. The institution is reported in the Top 300 in the QS World rankings for 2021 in the fields of Business and Management, Economics, and Social Sciences. The institution has over 250 partner universities worldwide. It is an AMBA accredited Business institution and the member of CEMS in Hungary.

About the country and the city

 Hungary is a member of the European Union and is located in the heart of Central-East Europe with roughly 10 million inhabitants. Budapest is not only the capital, but it is the political, economic and cultural centre of the country. Due to its unique natural and architectural factors it is one of the most popular tourist destinations in Europe (most airlines operate direct flights to Budapest). Each year millions arrive to admire the Castle District of Buda, the Saint Stephen’s Basilica, the Parliament building, the Synagogue in Dohány Street and to indulge in one of the famous baths. The city has good public transport system, its liveable and close to nature, and no one would feel lost here. According to The Economist, Budapest has overtaken Prague and Moscow as the most liveable city in Eastern Europe based on health, environmental, cultural, educational and infrastructural factors. The Great Market Hall is one of Europe’s historic fresh food markets – incidentally, located right beside the main building of Corvinus University.
